

MAGNOLIA CHURCH MOUSE

KEY FEATURES

- Bred by Glyn Church, Taranaki, New Zealand
- Super compact, slow growing form, develops naturally into a tidy ball shape
- Masses of highly fragrant, medium sized, creamy-white flowers in early spring
- Flowers drop cleanly – even in persistent heavy rain!
- Attractive to bees
- Disease resistant and drought tolerant once established
- Perfect as a graceful little topiary or container plant and excellent for picking
- 1m x 1m (average 10 years)
